Completed Projects

Indoor Golf Simulator Room – February 2026

The Indoor Golf Simulator Room was built from scratch and fitted out by a professional golf simulator company to provide two hitting stations with state-of-the-art simulator technology. The facility offers members a modern indoor golf experience with swing analysis, ball-flight tracking, virtual course play, and practice modes, allowing golfers to train and enjoy the game year-round regardless of weather, heat, or daylight conditions.

Automatic Doors throughout the Clubhouse – May 2026

Automatic doors were installed at key entrances throughout the clubhouse to provide members and guests with a more convenient, seamless, and modern arrival experience. The upgrade improves accessibility for all users, including members carrying golf equipment, families, elderly guests, and staff moving between operational areas.

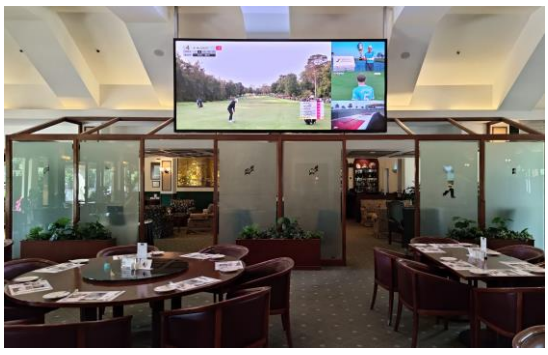

Large-Screen Television for Golfer's Grill – June 2026

A large-screen television was installed in the Golfer's Grill to enhance the dining and social experience for members and guests. The screen provides a modern visual feature for broadcasting live sports, club announcements, tournament coverage, event promotions, and other entertainment content, helping to create a more engaging and lively atmosphere within the venue.

Terrace Air-Con Control System – June 2026

The Terrace Air-Con Control System was installed on the front terrace to improve comfort for members and guests using the outdoor seating area. The system helps create a more pleasant terrace environment by reducing heat or cold discomfort and improving air circulation, encouraging members to make greater use of the outdoor space throughout the year.

Sakura Japanese Restaurant Entrance Refurbishment – September 2026

The Sakura Japanese Restaurant Entrance was refurbished to create a more attractive, welcoming, and refined arrival experience for members and guests. It also helps better reflect the quality and identity of the restaurant while improving the visual connection between the outlet and the wider clubhouse environment.

Outdoor Family Changing/Shower Room – September 2026

The Outdoor Integrated Changing and Shower Room was completed to provide members with a more convenient option when showering young children after swimming. It also helps address the issue of mixed-gender children changing or showering in the adult locker rooms, ensuring a more appropriate and comfortable environment for all members.
